EXECUTIVE SUMMARY

Enterprise Data & Analytics architect with 15+ years of experience designing secure, scalable analytics ecosystems that improved commercial excellence. Deep expertise across Microsoft Fabric, Power BI (semantic models, DAX), data warehousing, governance, and CRM/ERP integration (Salesforce). Known for building KPI-driven decision systems, modernizing legacy platforms to cloud-native architectures, and enabling self-service analytics across global teams.

CORE SKILLS

- **Microsoft Fabric:** Lakehouse/Warehouse, OneLake concepts, Dataflows Gen2, Pipelines (orchestration), Notebooks (PySpark), medallion architecture
- **Power BI:** Power BI Service/Desktop, semantic models, DAX measures, Power Query (M), data visualization, KPI dashboards, Row-Level Security (RLS), performance tuning
- **Data architecture & modeling:** enterprise data architecture, Kimball dimensional modeling, star schema, SCD Type 1/2, semantic layer design, data marts/data warehouse
- **Data engineering:** ETL/ELT, ingestion, data transformation, orchestration & monitoring; SQL (SQL Server/Oracle/Azure SQL), Python; data quality checks, automation
- **Governance & security:** data governance, RBAC/RLS, workspace governance, lineage, documentation, data quality; CI/CD, Git, release management (Azure DevOps/GitHub)
- **Business systems & delivery:** Salesforce Sales Cloud/CRMA, CRM–ERP integration (MuleSoft, Scribe), APIs, data migration; stakeholder management, requirements, roadmap, vendor management, Agile delivery

PROFESSIONAL EXPERIENCE

T.D. Williamson — Data Analytics Solutions Architect | 08/2019–Present

- Architected an end-to-end analytics ecosystem (data marts, governance workflows, semantic layers) serving 400+ users across 10 departments; improved KPI consistency and decision quality across commercial teams.
- Defined enterprise data modernization roadmap; led platform proofs-of-concept for Snowflake and Microsoft Fabric and produced target-state architecture, migration sequencing, and operating models.
- Delivered cross-functional Finance/Sales/Ops dashboards that cut decision latency from weeks to hours by standardizing metrics and automating refresh and distribution.
- Led Salesforce Sales Cloud migration and CRM harmonization: migrated 3M+ records and aligned multi-source CRM data with ERP to strengthen incentive/SPIFF tracking and revenue reconciliation. Implemented E2E E-Commerce product store.
- Built forecasting and commercial insight capabilities using Python (EDA/feature refinement) and ML techniques (decision trees, profiling algorithms, linear regression), surfaced through interactive Power BI dashboards.
- Chaired a BI Competency Group; mentored citizen developers and introduced self-service standards, boosting adoption while maintaining governance and performance.

T.D. Williamson — Senior Application Development Lead | 02/2017–07/2019

- Shifted reporting from static extracts to governed, model-driven business intelligence dashboards by designing enterprise semantic datasets and reusable KPI definitions.

- Engineered a comprehensive BI solution that improved operational efficiency by 30%+ across Sales, Product Management, Supply Chain, Quality and Finance through standardized models and automated reporting.
- Led data warehousing vendor evaluation and architecture decisioning to select a scalable, future-proof platform aligned to global growth and performance requirements.
- Architected CRM and delivered seamless ERP integration using MuleSoft and Scribe as the integration bus; improved process consistency across customer, pricing, and order domains.
- Managed multiple large-scale migrations (2M+ transactions) achieving 98% accuracy; supported setup and consolidation of new business entities.

T.D. Williamson — IT Service Delivery Manager, Applications Development | 05/2015–01/2017

- Built and rolled out a lean CRM/ERP application delivery framework, reducing development cost by 20% and time-to-production by 15%.
- Managed global service delivery for application development: release planning, vendor performance, incident prioritization, and stakeholder communications.
- Served as Vendor & Release Manager, establishing release governance and cadence to reduce deployment risk and improve predictability.

T.D. Williamson — Global IT Support Analyst / Developer | 09/2012–04/2015

- EMEA lead for CRM/ERP and BI support (Sales, Supply Chain, Finance, Operations) covering SSRS reporting and analytics troubleshooting.
- Developed and supported SQL/EDW and performance reporting solutions; maintained platforms including Cognos TM1/PAX, MS Dynamics CRM, and SSRS.
- Delivered production support, analysis, and successful go-lives across multiple releases and regions.

Earlier Career — Infosys / Temenos (2006–2012) | Telecom, Campaign Management & Revenue Reconciliation

- Campaign Management Application Analyst/Engineer (IBM Unica) for Belgacom/Proximus; led analysis, configuration, delivery for multi-channel campaigns and performance reporting.
- Revenue reconciliation and reporting support for telecom clients (Belgacom/Proximus, Verizon).

EDUCATION

- Post Graduate Program — Artificial Intelligence and Machine Learning: Business Applications
  University of Texas at Austin – McCombs School of Business (2025 – 2026) - In-Progress
- Bachelor of Engineering — Electrical & Electronics Engineering
  Anna University (2002-2006)

LANGUAGES

English (Professional Fluency), French (Basic Proficiency)

TECHNICAL STACK

- **BI & Analytics:** Microsoft Fabric, Power BI, Salesforce CRMA, SSRS, TM1/PAX
- **Data platforms:** SQL Server, Oracle, Teradata, Azure SQL
- **Integration & apps:** Salesforce, MS Dynamics CRM (2011/365), Microsoft AX, MuleSoft, Scribe, ServiceNow, SPIFF (Sales Performance Incentive Software)
- **Programming Languages:** SQL, DAX, Power Query (M), Python/PySpark, SSIS, PL/SQL, C++, Java, Unix/Linux Scripting
- **Delivery:** Agile, vendor management, release management
- **AI enablement:** Copilot agents; GitHub Copilot - AI-assisted dashboard & App development
